EDUCATION

University of Georgia, Morehead Honors College, School of Computing — Athens, GA
Bachelor of Science in Computer Science — *Expected* Spring 2027
National Merit Scholarship — GPA: 3.98

WORK EXPERIENCE

Computer Science Teaching Assistant | Atlanta, GA — April 2026 – July 2026
SMASH

- Facilitated small-group instruction and one-on-one technical support for 30+ students in Python programming, data science fundamentals, and AI API integration.
- Supported lead facilitators with grading assignments, tracking class participation, and preparing classroom materials

Undergraduate Research Assistant | Athens, GA — August 2025 – April 2026
UGA AI4STEM Education Center

- Assisted graduate researchers in scoring 1000+ student responses to benchmark LLM evaluation accuracy
- Co-designed an interactive study tool to test GenAI's impact on student learning retention while reviewing coursework.

PROJECTS

Web Vulnerability Demo | PHP, SQLite, JavaScript, WordPress Playground — October 2026

- Architected a deliberately vulnerable PHP/SQLite web application demonstrating OWASP Top 10 classes (SQLi, XSS, CSRF, IDOR) alongside side-by-side remediated implementations for comparative analysis.
- Implemented secure coding controls including parameterized queries, CSRF tokens, output encoding, authorization checks, and UUIDv4 identifiers.
- Documented each vulnerability as a formal finding: OWASP 2025 category mapping, CVE/CVSS severity rating, root cause analysis, exploit proof-of-concept, and defense-in-depth remediation.
- Containerized with Docker and published via WordPress Playground for reproducible testing and review

CineCache | Java, Spring Boot, JDBC, MySQL, Mustache — May 2026

- Spearheaded the development of a full-stack movie review web application using Java, Spring Boot, and JDBC to interface with a MySQL database.
- Integrated Mustache template engines with backend Spring controllers to dynamically render responsive, server-side user interfaces.

Class Forum Website | React, TypeScript, MongoDB, Tailwind, Motion, JWT — April 2026

- Co-developed a responsive full-stack web application using React and TypeScript to manage inflow of data from external APIs and MongoDB
- Designed modern user interfaces using Tailwind CSS and added fluid animations using Motion

CERTIFICATIONS & TRAINING

CompTIA Security+ • UGA Cybersecurity & Privacy (In Progress) • UGA Applied Data Science (In Progress)

SKILLS

- **Cybersecurity Tools:** Bash, Kali Linux, Nmap, Wireshark, Tcpdump
- **Programming Languages**: Java, Python, C, SQL
- **Web Development:** TypeScript, React, Next.js, Vue.js, Tailwind CSS, PHP, MongoDB, SQLite, WordPress
- **Data Science & ML:** NumPy, Pandas, sklearn, Seaborn, Matplotlib, PyTorch

RELEVANT COURSEWORK

Data Security & Privacy, Computing Networks, Database Management, Data Science & Applied ML II, Algorithms
